

–Your Personal Sommelier–

Hyerin Choi, DukYoung Eom, Woohyung Lee, Woohyun Park

Problem

Most people have no expert knowledge about wines, finds it hard to select great wines for their table depending on the event and preferences.

- Alternative solutions
 - Search for wines on the internet
 - subjective – recommended wine may have no middle ground
 - unreliable – anyone on the internet can create a wine list
 - Consult sommeliers to setup a list of wines
 - Unrealistic in most cases
 - Well thought wine list cost about \$300 per consulting

Our Solution

For anyone who does not have expert knowledge about wines, PODO offers :

- Filtered wine searches
- Graphic representation of values
 - wine's Softness, Sweetness, Smoothness, Lightness
- Recommend similar wines and personalized recommendations for logged in users
- Wine lists made by sommeliers for specific themes

to allow users to select wines fit their event and personal preferences

List of Improvements can be made in the future

- Deploy backend to AWS.
 - Heroku only supports EU and US region which causes delayed response time.
- Rendering time improvement by refactoring the component
- Rendering time improvement by reducing the number of request to Backend
- Layout Designs
